Cuban Mafia

NARCOTICS and Customs officials have been trying to block heroin at the East and West Coast ports of entry. But, sad to say, their effort has now sprung leaks in the South.

More and more heroin is coming in through the Caribbean Islands and Latin America. The Caribbean smugglers bring in the dope from France and sneak it into the United States with light planes and fast motor boats —just as in the prohibition era.

Result: a Cuban mafia has sprung up in Miami.
